DYNAFENCE
FAST AND EASY TO INSTALL

A revolution in timber fencing

DynaFence™ comes in prefabricated modular fence panels, that are easy to handle. It is a simple design and can be used on slopes up to 1:6 gradient. Just fasten together with a few screws, and this makes for a fence that can be installed twice as quick!!

Yes, that is right – DOUBLE your install speed.

This means that for fencing contractors, you can double your revenue while your overheads stay the same.

DynaFence benefits

Fast and easy to install – no nails and suits sloping land

Maintains good neighbours – looks the same from both sides

Long lasting – stays straight and sturdy

Australian design developed for our climate

Can be designed to be pool fencing compliant

DYNAFENCE
FAST AND EASY TO INSTALL

Solutions prefabricated

DynaFence™ is manufactured in our own factory and sold to customers as a completed prefabricated panel.

Variations

Gates

Gates are essential for any fence system, and the DynaFence™ is no exception. Our systems are designed to manufacture personnel gates as well. Order your gates from us too, which are designed to look just like the rest of the fence. They come as a modular item, so you can quickly customise it onsite to your requirements.

Half-panels

To ensure you can quickly do any corners, returns, or smaller sections, we can also prefabricate part-panels to order.

This will ensure that you can continue to install quickly onsite.

Stiffeners

For sections or areas where higher strength is needed in your posts, we can supply you with powder coated steel posts.

Integration with retaining wall

The DynaFence™ system can easily be installed on top of concrete sleeper retaining walls, or be integrated with the smaller timber sleeper retaining walls. This will ensure that it can be used in every situation.

DYNAFENCE
FAST AND EASY TO INSTALL

Easy installation

Steps

Plan your fencing installation

- 1 Set out post spacings**
Pay close attention to boundaries, corners and ends.

- 2 Dig holes**

Install your end and corner posts

- 3 Mix and pour concrete into end and corner post holes**
By using a dry batch, this will help support the post to ensure it stays straight.

- 4 Set end posts, corner posts**

Begin your fence panel installation, start from an end or corner post

- 5 Connect the DynaFence™ panel to a post**
Fasten using the screws provided.

- 6 Mix and pour concrete into the next post hole**
By using a dry batch, this will help support the post to ensure it stays straight.

- 7 Fasten a post onto the free end of the DynaFence™ panel**

- 8 Repeat steps 5-7 until your fencing installation is completed.**
